HOW TO MEASURE CORRECTLY

For the most accurate measurements, have someone else do the measuring, stand tall, yet relaxed and let the arms hang down at the sides. Keep the tape measure snug against the body and the tape measure parallel to the ground. Measurements are to be used as general guidelines for the corresponding sizes.

- **Bust/Chest:** Lift your arms, and wrap the measuring tape around the fullest part of your bust/chest. Where the measuring tape overlaps is the measurement that you should use.
- **Waist:** Wrap the measuring tape around your natural waist, which is approximately 2 inches above your belly button.
- **Hip:** Measure at the fullest part of your bottom and thighs. See our size chart below.
- **Hollow-to-Hem:** Measure from the center of your collarbone (hollow) to the bottom (hem) of your dress.

You may not line up with one size so choose a size with your largest measurement.
